

Drew Domkus

Experience

D&D Productions

Media Producer, Principal

September 2004 - Present, Wisconsin + Costa Rica

I produce one of the longest running, award winning podcasts on the internet, *The Dawn and Drew Show!* as well as *Dawn and Drew TV* and *Nerd Moment*. These 1000+ multi-media episodes include workflows for various types of production, such as digital artwork & websites, audio recording & editing, video filming & editing, as well as live and remote shows from multiple countries. My team also produced daily drive-time content for Sirius satellite over a 2 year period. Our global audience has helped us get our work featured in major news outlets such as Time, USA Today, CNN, and Rolling Stone, just to name a few. My responsibilities specialize in logo creation, website design & development, audio production & publication, as well as promotions, SEO, marketing & analytics.

Under the Corset with Rasputina

In 2010, we produced a documentary on the band Rasputina, an intimate look into the music and mind of Melora Creager. I was responsible for converting footage, editing parts of the movie, design and layout of the product itself, the website and fulfillment of DVD orders. It was an intense project that I was able to coordinate with team members around the country.

Quad/Creative - Milwaukee Magazine

Digital Media Specialist

August 1999 - September 2005, Milwaukee, Wisconsin

For over six years, I was responsible for global hardware and software upgrades, and troubleshooting during my tenure. I also supported over 100 people between both businesses. Design experience included concepting, presentations, installations, and website design as well as development through to completion.

Panda Communications

Graphic Designer / Webmaster

March 1997 - July 1999, Milwaukee, Wisconsin

My responsibilities at this safety catalog company changed as I learned HTML and Filemaker Pro. Beginning as a graphic designer and production artist, I then utilized my growing system administrations and web development knowledge to build a vast intranet for their internal usage as well as public and client web portals that they still use.

Print World

Graphic Designer / Manager

March 1997 - July 1999, Milwaukee, Wisconsin

Providing management of supplies, schedules, and quality assurance on projects, I was responsible for operations at this print shop which served an abundance of Marquette University's community via graphic design and customer relations.

Recycler Classifieds

Designer / Manager

November 1989 - July 1995, Los Angeles, California

Starting out as an advertising sales executive, I quickly became a production artist that assisted with the layout 12 separate editions of this publication every week. Leveraging my production skills, I joined "Photo Buys", which was a sister publication, and was promoted to manager over all production.

Education

Los Angeles Valley College

Van Nuys, California

I spent two years studying Fine art, Art History, Life Drawing, Mechanical and Architectural Drafting, and Graphic Design.
